Want to get the most out of your tools and make building your pages even easier? Go through the ThriveArchitect Walkthrough Guide available here: <https://thrivethemes.com/thrive-architect-tutorials-2/>

Step 1. Edit Your Header

Log into your WordPress site and open your Home Page. Click on your header. The edit panel should slide out from the left hand side. Click on “Edit Header”. Then click on the placeholder logo and replace the image with your sites logo. Once you’re done editing the header, click “Done” and save your page.

Step 2. Edit Your Footer

Click on your footer. The edit panel should slide out from the left hand side. Click on “Edit Footer”. Then click on the image and replace the image with your sites logo.

After editing the image, click on the Footer Menu and update all the links in the menu to match the URL of the pages you created in the previous step. Once you’re done editing the footer, click “Done” and save your page.

Your header and footer should now automatically be applied to all pages on your site.
